

HOW TO MAINTAIN YOUR GYM WALL PADS

Maintaining your pads is crucial for their longevity. Why invest in a professional pad system without taking steps to ensure they maintain their new, professional look for years to come?

Here are a few simple care steps to keep your pads looking fresh and clean:

1. Wipe the pads periodically with water. Since these are indoor pads, water alone will keep them looking new.
2. Promptly repair any cuts or tears using Tear-Aid, available through Aer-Flo or their dealer.
